summary

full-stack, product-oriented engineer with over 15 years of experience who loves building user-friendly products end to end, from idea to production, and helping teams do the same, both in startups and big companies.

main skills

- TypeScript / Dart, working knowledge of Python & Scala
- React / Node.js / React Native / Flutter
- AI/LLM integration, RAG & prompt engineering
- platform engineering & AppSec: Kubernetes, Docker, CI/CD, vulnerability management
- UX & accessibility, team leadership & hiring

experience

▼ Evolution Engineering / mar 2025 –

`lead front-end engineer · full-stack scope`

- led the front-end team of a B2B back office platform: technical direction, standards, code reviews, hiring & onboarding
- built an AI help assistant from scratch and shipped it to external clients: LLM with RAG, streaming chat UI & admin console
- delivered a natural-language report builder and advanced data visualisation across the reporting suite
- replaced a legacy help centre with a docs-as-code knowledge platform, owning it from content to Kubernetes & auth in production
- acted as the team's security champion, liaising between security architects and engineers: CVE triage, audits, remediation priorities
- owned the Module Federation host app & shared tooling, and drove AI-assisted development adoption across teams

▼ Plentific / apr 2022 – mar 2025

`senior software engineer`

- delivered core business functionality for the back office proptech platform
- owned platform responsibilities: CI/CD, internal tooling, DX & light DevOps; took part in technical hiring
- migrated legacy Jenkins pipelines to GitHub Actions, cutting deployment times by almost 90%

▼ Stepwise / mar 2020 – mar 2022

`front-end & Flutter lead / core member`

- led Flutter development of a smart building management app, driving R&D and team direction
- delivered React apps for financial & energy sector clients, from customer-facing products to internal tools
- shaped engineering culture: CI/CD, code review practices, technical interview process, tech talks & workshops

▼ earlier

- `IGT` / mar 2015 – feb 2020 / senior front-end developer: React & React Native gaming products, Angular back office, ADA accessibility
- `CodersLab` / sep 2016 – jan 2020 / lecturer & mentor: React bootcamps, workshops, 1:1 mentoring
- `24/7 Communication` / oct 2014 – feb 2015 / front-end developer: WordPress & Facebook campaign apps for agency clients
- `freelance` / 2007 – / WordPress, UI design & landing pages for design agencies
